PROFILE

Analyst with hands-on experience building end-to-end projects across Finance, HR, and Retail — using SQL (CTEs, Window Functions), Power BI (DAX, Power Query), and Excel (Pivot Tables, Dashboards) to turn raw data into actionable business insights.

EDUCATION

Bachelor of Physics and Computer Science 2024
Faculty Of Sciences

PROJECTS

Financial performance & Revenue Analysis- SQL 04/2026

- Developed a data-driven framework to analyze financial health, revenue streams, and profitability trends using advanced SQL querying.
- Utilized advanced SQL (CTEs & Window Functions) to calculate financial KPIs like YoY Growth and automate transactional audits to identify cost-saving opportunities

HR Analysis Dashboard - Power BI 03/2026

- Developed a 3-page interactive Power BI dashboard to analyze employee attrition and support data-driven HR decisions across a dataset of 1,470 employees and \$9.6M in total payroll.
- Cleaned and pre-processed raw HR data using Power Query, developed complex DAX measures, and designed an intuitive interface with interactive slicers filtering by Department, Job Role, Business Travel, and Education Field.
- Identified a 16% attrition rate (237 employees), revealed overtime employees were 54% more likely to leave, and analyzed workforce demographics (avg age: 37, 60/40 gender ratio, avg tenure: 7 years) — enabling targeted HR retention strategies.

Retail Sales Analysis – Excel 03/2026

- Analyzed a Superstore dataset spanning 4 years (2010–2013) across 4 regions and 130,064 total orders to identify regional sales trends and the impact of discount strategies.
- Processed \$8.6M in total sales and \$2.4M in total profit, identifying the Central region as the highest-performing region with 31% of total orders and uncovering \$1.15M in total losses to highlight cost-saving opportunities.
- Built dynamic Pivot Tables to summarize sales, net profit, and shipping costs by year and product category, and designed a professional Excel dashboard using Slicers and Pivot Charts to visualize top-performing products and regional performance — with Regular Air (75%) identified as the dominant shipping mode.

CERTIFICATES & COURSES

Google Data Analytics Professional Certificate 07/2026
Coursera

- Completed an intensive 9-course professional program covering the end-to-end data analysis process.
- Gained hands-on experience in data cleaning, analysis, and visualization using Spreadsheets, SQL, Tableau, and Python.
- Developed a comprehensive data analytics capstone project to solve real-world business challenges.

Data Literacy 07/2026
IBM SkillsBuild

- Developed foundational knowledge in interpreting data sources, ensuring data quality, and driving data-informed decisions.

- Mastered key concepts in analytical thinking, chart interpretation, and responsible/ethical data collection and usage.

Dashboard Design Concepts
DataCamp

06/2026

- Applied core dashboard design principles to build intuitive, business-oriented visual interfaces for stakeholders.
- Leveraged UI/UX fundamentals — color theory, consistent layout structures, and reduced cognitive load — to enhance dashboard usability.
- Designed functional mockups that ensured seamless data storytelling and actionable insights across Power BI and Excel dashboards.

Professional Data Analysis Diploma
Machinify Academy

12/2025 – 04/2026

- Gained practical proficiency in Excel (Pivot Tables, advanced functions), SQL (querying, CTEs, window functions), Python (data manipulation), and Power BI (DAX, Power Query, dashboard design) through real-world projects and case studies.

EXPERIENCE

Administrative Officer - Engineering Authority
Egyptian Armed Forces

10/2024 – 11/2025
Egypt

- Served in the Engineering Authority of the Egyptian Armed Forces, contributing to administrative and documentation operations.
- Prepared and managed official technical reports, documentation, and presentations using Microsoft Word, Excel, and PowerPoint in a structured military-engineering environment.
- Developed strong attention to detail and deadline management skills through handling official administrative records.
- Continued self-directed learning in Data Analytics during off-duty hours via online platforms.

SKILLS

Power BI | DAX | Excel | Pivot Tables | Data Cleaning | Power Query | ETL | SQL | Python |
Tableau | Dashboard Design | KPI Reporting
